

Lutron® | Excellence Awards

2010 Excellence Award Categories

We know how much heart and soul you pour into your customers' projects, and often without much thanks or recognition. Lutron wants to recognize you for a job well done over the past year.

This year's Excellence Awards celebration will be held on Thursday, Sept. 23, 2010, at the Georgia Aquarium. Awards will be presented for the following categories:

Best Green Project - Energy savings products are being incorporated into new and existing residences more than ever. Show us how you've used Lutron products to help your customers be more "Green."

Best Retrofit Project Using RF Products - Bringing lighting control where lighting control has not gone before. Enter the "impossible" projects, where, without an RF solution, lighting control would not be possible. Tell us about a recent remodel or existing home that added a Lutron system after the walls were up.

Best Total Light Control Project - The winning project will truly represent a total Lutron home lighting control solution – lights, shades, Lutron Ivalo fixtures, fan controls, accessories, the works.

Best Shade Project - Enter your largest shade projects, your most unique projects, or a combination of both. Show us how this Lutron product is helping you grow your business.

Most Unique Application - We love hearing about unusual homeowner control requests and applications in which the Lutron products solved a problem. A previous winner in this category mounted a keypad at canine height for the dog to control his own outside door.

Best International Project - A palace in the Middle East? A condo in Dubai? A private residence in Spain? Tell us about your best overseas project.

Best Integration with Third-Party Equipment - Getting tricky with a home's sub-systems...that's what you do everyday. Now take a few minutes to tell us about your best integration project.

Best Showroom/Experience Center - You understand that clients need to experience the magic of Lutron systems first-hand. Tell us about your showroom/experience center and how it's helping grow your business.

Best Use of Lighting Control in a Home Theater / Media Room / (Single room) - Lighting control doesn't have to be about whole-home systems... tell us about your best application of Lutron products in a single room/space – think GRAFIK Eye, Maestro Wireless, etc.

Best Dealer/Designer Collaboration Award: Tell us about your most memorable project where you collaborated with an interior designer to utilize Lutron controls, colors, and fabrics to make even the most ambitious vision a reality.
